

What Adapter Do I Need?

The [Ford Power Promise™](#) is designed to help make all-electric Ford vehicle ownership easy by supporting Guests in areas that matter most—like charging on the road.

Key Checklist

This document will help determine if customers:

- 1 Need an adapter?
- 2 Have the right adapter?
- 3 Know how to purchase an adapter?

Further Questions? Call the Ford Customer Relationship Center (CRC) at 1-800-392-3673.

Have the Right Adapter?

The Ford Fast Charging Adapter is approved for use on designated Tesla Superchargers and other DC Fast Chargers with NACS connections. See Charts on Page 2.

IMPORTANT NOTE: To avoid the risk of serious injury and property damage, only use NACS DC adapters sold or provided by Ford or Tesla for use at Tesla Superchargers. Tesla prohibits the use of any other adapter with Tesla charging stations. Ford does not guarantee compatibility with aftermarket charging adapters.

Can multiple adapters be combined?

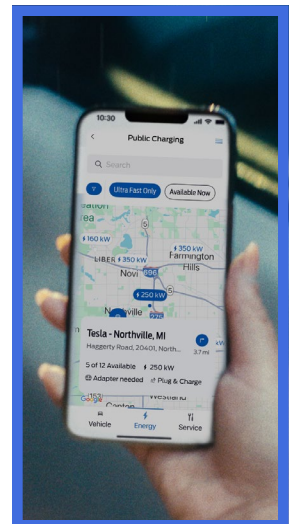

No. Ford only recommends using a Ford-approved adapter as instructed.

Do Customers Need an Adapter?

The Tesla Supercharger Network has been integrated into Ford's [BlueOval™](#) Charge Network. All Ford vehicles will require a [Ford Fast Charging \(NACS\) adapter](#) in order to use Tesla Superchargers. Ford has an approved adapter for use at Tesla Superchargers called the Ford Fast Charging Adapter (NACS).

What Ford tools will inform if an adapter is needed?

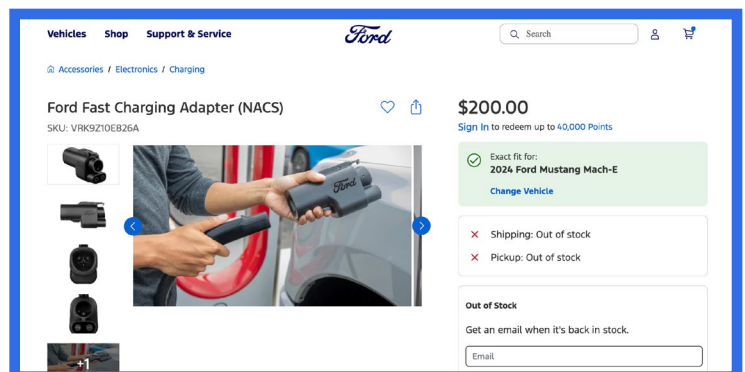

FordPass or the Public Charging app can inform owners when a Fast Charging Adapter is needed for a Tesla Supercharger.

How to Purchase a Ford Fast Charging Adapter

Scan the QR code above to purchase the [Ford Fast Charging Adapter \(NACS\)](#). The adapter will only work with designated [Tesla](#) and [non-Tesla NACS DC Fast Chargers](#).

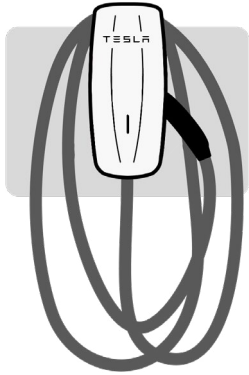

It is not designed to work with AC chargers (Home Chargers, Tesla Destination Chargers, or publicly available Level 1 and Level 2 Chargers).
